Group Project – Project 2

Overview:

Students of 3 or 4 team up to work on a website project of common interest. Team members of each group collaborate on design and development of a responsive web site **using recommended design practices**. The web site **MUST** contain **at least 4 (and 5 for a group of 4 members)** content pages**,** facilitated with external style sheets.

Week 10 – Submit your groups by email to the professor

Week 12 – Submit the topic of your website, wireframe of the home page and list of pages and who is coding which page

Week 15 – Website is presented in class

Instructions:

- Each in the group must complete at least 1 pages towards the final project.
- **Each page should come with a different page layout. Pages with identical layout will be consider as one page.**
- **Each page should contain at lease 1.5 screen-height content when displayed on a 1920*1080 desktop/laptop screen.**
- Assign Project Roles as need to ensure work is completed on time
- Appropriate meta tags
- Appropriate semantic HTML5 tags (nav, main, aside, etc..)
- One page utilizing tables effectively to display tabular information
- One page utilizing <form>
- Consistent common components across the entire website
- External style sheet only (.css file)
- Two responsive views, desktop view and mobile view (at 768px)
- Responsive or Flexible images without distortion
- Utilize FlexBox or CSS Grid for responsiveness

Evaluation Criteria

Pages are weighted equally. Lack of pages or page content (1.5 screen-height) results in proportional deduction in marks.

On top of that, follow rubrics for grading criteria (Course Tools -> Rubrics)

Late submission penalty - 10% per day

The attached project rubric provides a breakdown of the project requirements and more specific grading criteria addressing common issues are given below:

- **MUST be coded from scratch, no external libraries (except fonts) or templates allowed. All external libraries will be removed when grading.**
- accessibility (-5%)
- no inline & embedded styles (-10%)
- no image distortion (-10%)
- must following HTML.5 standard (using header, nav, main, footer, aside, etc) (-10%)
- strict separation of information from presentation (styles), (-10%)
- the URL s for graphics from internet must be provided (as comments in source code) (-10%)
- syntax error (-10%)
- any other mistake (-5%)

Submitting Your Project

Once you have your responsive table site complete, please submit your project files to the attached dropbox. The files should be uploaded in zip format with the following syntax: *YourName_FinalProject.zip*
